Delivered Date: 08/30/2011 10:41 AM PST
Subject: RE: Status of Draft Site Characterization Report

Hi Brandon-

I'm sorry I never responded to this. We are in the middle of some comment resolution right now. Let me get through the meetings this week and get back to you. I think there may be some changes. I need to prepare an update for next week to mgrs and political stakeholders so I can include you on that.

Thanks,

Ann

Ann

Thanks for the update. I'm not really concerned about the data. It's more Section 3.1 as we will be using that as our basis for how the sulfolane was released to the environment. Are there any disputes or recommended major changes to this section?

Subject: RE: Status of Draft Site Characterization Report

The date we've given them for another draft of the report, including this year's field work, is dec.31, 2011. Final is feb. 24, 2012.

I don't think the data will change Brandon. It's more filling the data gaps with more data that will occur.

Ann

Hi Ann

I'm not sure if you talked about this on the call yesterday and I missed it, but when do you anticipate the Site Characterization Report going

final? We would like to use some of the information in the report, but would prefer to wait until it's final.
